PAST EXPERIENCES

Intern - La Croix Bleue, 2023

- Objective: Facilitate the management of Bitbucket repositories for deployment and development.
- Responsibility: Front-end development of the application in React.TS.
- Framework: Agile methodology.

Web Developer - My account , 2021 - Now

- Building two full websites using HTML, CSS, and JavaScript
- Gaining valuable experience in meeting client needs
- Continuous maintenance and hosting of the sites to provide ongoing support to clients

Web developer /Intern, Astropof Inc, 2021 - Now

- Entry into the web development industry within a specialized company
- Responsibilities encompassing several fundamental technologies:
  - Programming in HTML, CSS, JavaScript, and PHP
  - Managing multiple sites using Wordpress and ModX
  - First experience with Content Management Systems (CMS)

PROFILE

Trained as a full-stack developer, I am self-sufficient and naturally curious. With a strong blend of creativity and logic, I learn quickly and proactively. Challenges are essential to keep me stimulated and engaged.

In both French and English, I have a knack for simplifying problems for my team to support the progress of complex projects.

TOOLS I USE

Javascript, Typescript

React, Vue

.NET, C#

MySQL, NoSQL

HTML, CSS

Jira,

NodeJS,

Git

Photoshop, Lightroom

Figma

EDUCATION

Full-Stack Software Development AEC
- Cégep de Shawinigan (2023)

Front-End Web Development Bootcamp
- Treehouse.com

SOFT SKILLS

- Good at simplifying concepts
- Problem analysis and resolution
- Team player
- Patience
- Sense of responsibility

PAST PROJECTS

Synthesis Project (2023)

- Vue.ts / Node.js (Express.js) / MongoDB (Mongoose), Qualité Logicielle (Vitest)

- Campsite Booking Application with an Interactive Map
- Necessary skills:
  - Effective collaboration capability
  - Expertise in fundamental Git principles
  - Practice of Agile methodology
  - Functional deliveries
  - Creating an operational project for production deployment

Atlas Project (2023)

- Vue.ts / Node.js (Express.js) / MongoDB (Mongoose)

- Transactional application
- Integration of CRUD functionalities (Create, Read, Update, Delete)
- Connection to NoSQL databases
- Implementation of robust authentication systems using JWT (JSON Web Tokens)
- Image file management
- Programming of server-side and client-side application logic
- Code optimization for optimal final product performance

Audio Player (2022)

- Javascript

- Mastery of manipulating Document Object Model (DOM)
- Programming asynchronous calls
- Implementation of effective interactions between web interface and user

Song List Management (2022)

- C#

- Producing class modelling conforming to the proposed problem solution
- Implementing these models into classes and coding them in a programming language
- Carrying out all these tasks in accordance with industry standards.
